

COMMUNITY THERMAL IMAGING PROJECT

Helping You Keep Your Warmth In

SAXTEAD PARISH COUNCIL has booked a thermal imaging camera for free over **TUESDAY 30th JANUARY to MONDAY 19TH FEBRUARY 2024**

Our aim is to raise awareness about insulation and help you improve the energy efficiency of your home. This could mean:

- ❖ a reduction in fuel bills
- ❖ better health
- ❖ reducing your carbon emissions

Visit www.greensuffolk.org for further help & information

What can you learn from a thermal imaging survey?

If your house is relatively new, already has insulated cavity walls and double glazing and feels warm – you might not learn much, except to get an even warmer glow after confirming your house is well insulated!

If your house is older and seems difficult to keep warm - you might learn exactly where the heat is escaping and get some ideas about where to insulate. A thermal imaging survey might:

- ❖ identify places which might have draughts
- ❖ detect whether cavity wall insulation is patchy or missing
- ❖ detect areas with less loft insulation

If you would like us to include your house in the survey please contact us on:

Paulaslater1@icloud.com

The cameras use infra-red radiation which *cannot* pass through glass. This means the camera cannot see through windows, doors or walls. A thermal imaging survey will not invade your privacy as we will only see the outside surface of your house.
